

Abstract of the Disclosure  
Wireless Communication Device, System  
and Communication Method

5       A wireless communication device (2) comprises a mobile  
unit for transmission and reception of voice calls through  
a mobile phone network having a user-accessible dial  
button (10) controlling a call activation switch, the unit  
being programmed to communicate with a first stored  
10       telephone number, which is typically that of a call centre  
able to provide assistance, on operation of said call  
activation switch, the unit also being provided with  
location determining functionality.
